

About Us

We are a recovery--based program that provides a warm welcoming environment in which adults with substance use and co--occurring needs can obtain support, advocacy, recovery planning and referrals during times when most resources are unavailable.

Pathways is based on the "Living Room" model which aims to provide support to individuals in recovery, improving gaps in service delivery, reducing emergency room visits and having "no wrong door" access to services in the community.

Peer Recovery Coaches staff the engagement center.

Who is served...

Adults, who wish to engage in recovery-based programming, are encouraged to contact us. Insurance, or lack thereof, is not a barrier to treatment.

Our hope is to provide an environment in which individuals feel empowered and supported at any stage of their recovery journey.

Program

Services Provided

Peer Recovery Coaches will guide and support individuals in:

- Developing recovery plans;
- Conducting a thorough assessment;
- Linkage to community resources;
- Determining their level of care needed while taking into consideration the "whole person."
